

Our Principal Consultant, Owen Bassett, has now an established career in forest science; experienced with the production of peer-reviewed scientific papers, reviews, guidelines, policy documents and operating procedures. Owen's method of communication also includes the provision of interim field-reports for every forest/site visit undertaken for clients. This ensures a maximum flow of information and feedback is returned swiftly to the client on the issue at hand.

Forest Solutions is able to join other cooperative research organisations to fill specific areas of expertise within teams, and can lead or contribute to the reporting of projects as author or co-author. Forest Solutions' involvement will ensure rapid reporting and timely project finalisation.
