

Management, Administration and Support

Jenny is our Co-Director and Secretary, and provides administrative and technical support.

Jenny has a strong affinity and regard for forest environments. At a personal level she uses forests for quiet rest and contemplation, and maintains an abiding interest in professional forest activities undertaken by Forest Solutions; assisting with measurements, sample analysis, data management and field observations. She has a particular capacity for observation, having discovered a number of rare orchid species in recent years.

As a trained and qualified Teacher, Jenny brings to Forest Solutions a valuable knowledge of training. She assists with the development of training packages delivered by Owen. She also provides an invaluable support capacity, enabling data and information management, laboratory analysis of forest samples, business development, document review and corporate planning.

Jenny has a strong sense of ethics that enhances our culture and business integrity. Her

empathy, understanding and intuitive capacity with people provides a strong HR management capacity for Forest Solutions. It is our vision that Forest Solutions will become an employer of choice, with staff and contractors choosing to associate long-term.
